

Dental Curing Light

Model DCL-100-E1

Engineered by Polymatech for human comfort

A cordless LED curing light with six clinical modes, constant optical power output and a charging base that checks light intensity.

6

Built-in curing modes

385-515 nm

Wavelength range

2500 mW/cm²

Peak intensity, Bracket Mode

2000 mAh

Battery, with charging base

Why DCL-100-E1

■ Constant optical power

Curing performance is not affected as the battery level falls.

■ Light-intensity check

The charging base has a built-in light-intensity detection function.

■ Aluminium-alloy body

Integrated industrial aluminium housing for durability and heat dissipation.

■ English-only interface

Clear, intuitive display, with automatic power-off after 5 minutes of inactivity.

■ Curing depth

Not less than 4 mm within 10 seconds in light-cured composite resin.

■ Low-battery protection

Monitors battery level and shuts down automatically when it is low.
